

SCHINDLER AHEAD BLACKBOARD

DISPLAY INFORMATION.
CONNECT WITH RESIDENTS.

The Schindler Ahead BlackBoard is a digital and interactive notice screen. A modern version of the familiar and popular paper notice board, it is where residents get their latest building information, look up contact details or simply place personal messages. Now, with Schindler Ahead BlackBoard, everything is digital, customizable and much more interactive.

CONNECTED COMMUNITY

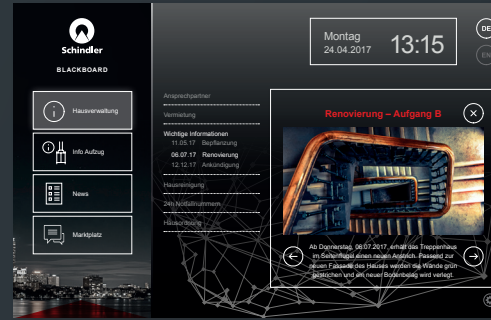

The Schindler Ahead BlackBoard is located in the main entrance hall. It sits prominently next to the elevator, the place everyone passes by at least once a day. Using the touch-screen display, information can be selected and edited by residents – for example providing feedback to the building management. Since it is web-enabled via Ahead Cube technology, Schindler Ahead BlackBoard can display the news, weather, time and other information.

EVERYTHING DELIVERED AND INSTALLED

Schindler Ahead BlackBoard can – but does not have to be – connected to the elevator. In this way it works for all buildings and all elevator brands, and you still get the full set of features. Schindler provides all you need to create the next-generation building info-point. The modern information, communication and entertainment platform.

SCHINDLER AHEAD BLACKBOARD

FEATURES

Information

What you see is what you get – information is displayed instantly. You can access and edit content via a web-based system. Choose between static content, such as contacts, or flexible information, such as for day-time or events. The content can be individual for each screen or the same for multiple screens. Keep residents updated.

Social

Foster a vibrant community – have residents sharing information via the community section on the board and via the App. BlackBoard acts as a much more interactive and faster version of a paper notice board. Looking for a dog sitter or specific tool? There is a neighbor who can help. Sharing is caring.

Interaction

Schindler Ahead BlackBoard enables residents to submit information to the building management. Registered residents can also help to keep the building in good shape – they can easily submit feedback about cleanliness and technical issues. In any emergencies, news appears prominently on the screen. Be in the know.

Customization

Sometimes life is black and white, sometimes colorful. Schindler Ahead BlackBoard is designed for readability and high contrast, but if you want to add a personal twist, you can customize the on-screen appearance. Another powerful feature shows advertisements on the board. Local retail outlets or nationwide online shops – link them up.

BENEFITS

Clarity

Always know what is going on and, in the case of issues, residents know if the facility management is aware too.

Accessible

Schindler Ahead BlackBoard is accessible and accepted by all residents. Fully transparent about what is happening on the premises.

Up-to-date

Super-fast, stress-free communication with residents via the intuitive interface for building managers.
